

Gender Pay Gap Report

Introduction

I confirm the information and data reported is accurate as of the snapshot date 5 April 2017.

Julia Robertson
Group CEO, Impellam Group Plc

At SRG, we welcome the opportunity to share our gender pay gap as it will help us have more meaningful conversations with our people and our customers about equality, diversity and inclusion.

SRG has an overall gender pay gap of 12.43%, which is below the national average of 18.8%.

Of the people included in the calculations, 93% are temporary workers whose pay is fixed by our customers. In the interests of full disclosure, we have also chosen to provide an analysis of our 88 permanent UK employees.

Among SRG's permanent employees the median gender pay gap is -10.59%. Our pay structure equally rewards men and women performing the same roles, yet women make up more than half of our people in all of our pay quartiles except the lowest, giving us a gap in favour of women.

Our gender pay gap figures demonstrate good progress on gender diversity in the often male-dominated life sciences sector.

Our own industry salary survey in conjunction with New Scientist showed that internationally men are paid on average £41,240 compared to women who on average earn £32,986, with the UK having a larger gap between male and female salaries than the US and Europe.

Gender Pay Gap Reporting will help bring attention to these issues that need to be addressed across our industry.

We are proud of the progress we have made with diversity and inclusion and understanding our gender pay gap drives us to do more.

We are investing in a range of initiatives to bring about change and this report outlines more detail about what we are undertaking as part of a broader focus on creating a more inclusive workplace.

Kelly Morton

Managing Director, SRG

Understanding the gender pay gap

Gender pay vs equal pay

A gender pay gap shows the difference in average pay across all the men and women in an organisation, industry or country as a whole. It can be driven by the differing number of men and women across all roles.

It is not the same as an equal pay comparison which looks at how much men and women are paid for doing the same role.

How we calculated our numbers

Under the UK Government's new Gender Pay Gap regulation, companies need to report their gender pay gap for all legal entities in Great Britain with more than 250 employees. We have provided data on all of our permanent and temporary employees, as required by the regulation.

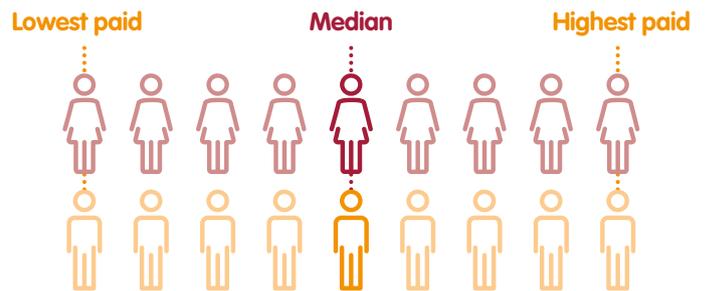

Given we are a staffing business we have a very high number of temporary workers on our payrolls at any one time. This number fluctuates depending on requirements from our clients, and typically the rate of pay that our temporary workers receive is decided by our clients. We have also reported on our permanent employees only and our temporary employees only.

Pay quartiles explained

A pay quartile is calculated by listing the hourly pay rates for everyone in the business then dividing them in to four equal sized groups. We then work out the percentage of men and women in each group.

Mean and median gaps explained

The figure used most regularly is the **median gender pay gap**. To help bring this to life, imagine all of the women at SRG standing in one line, from lowest paid by hour to highest, and all of the men doing the same in another line. The median gender pay gap is the percentage difference in hourly pay between the woman in the middle of the line and the man in the middle of the line. Hourly pay includes leave and any shift premiums, but not overtime.

The **mean gender pay gap** is the percentage difference in the average pay of men and women. This is calculated by adding up all of the hourly pay rates for all of the women in a business and dividing it by the number of women, then doing the same for the men and comparing the difference. The mean can be affected by different numbers of men and women in different roles. This is why we also report the number of men and women in different pay quartiles.

We also report the median and mean differences in bonus pay over a twelve-month period, and the percentage of men and women who received a bonus.

A positive percentage shows a gap in favour of men; a negative percentage shows a gap in favour of women.

Our figures for 2017

All UK employees, including temporary and permanent

Pay - hourly rate

Median

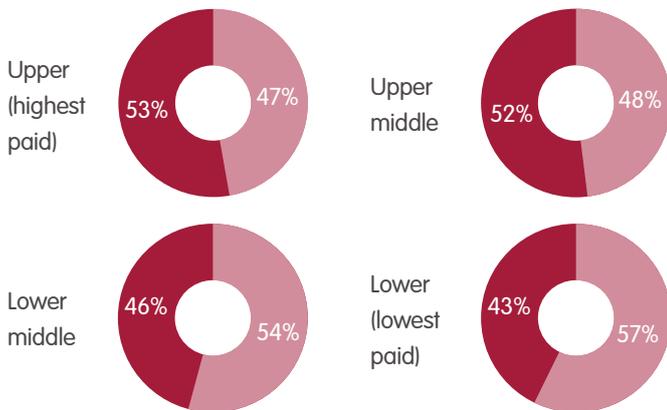

12.43%

Mean

7.00%

Proportion of employees according to quartile bands

● Male ● Female

Bonus pay difference between men and women

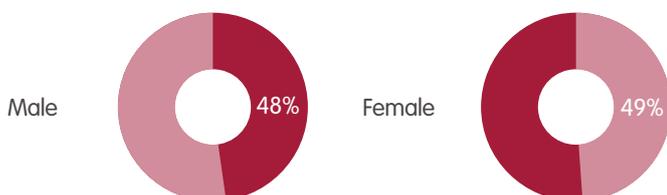

Median

2.39%

Mean

36.02%

Percentage of males / females receiving a bonus payment

Did you know?

- SRG has a median gender pay gap of 12.43%, which is lower than the UK average of 18.8%. Our gender split is slightly in favour of women, yet we have a higher percentage of men in higher paid roles, giving us a gap.
- This is also the cause of our gender bonus gap as the employees with the opportunity to earn the highest amounts of bonus are those in the upper quartiles.
- Among our salaried employees only, we have a reverse gender pay gap of -10.59%. We are in the unusual position in our industry of having more women in upper quartiles and more men in lower quartiles.

Permanent employees only

Median / mean hourly pay gap	-10.59 / 4.93%
Median / mean bonus pay gap	39.21 / 45.69%
% males / females receiving a bonus payment	71.11 / 63.16%
Upper quartile (male / female %)	48.15 / 51.85%
Upper middle quartile (male / female %)	44.44 / 55.56%
Lower middle quartile (male / female %)	50.00 / 50.00%
Lower quartile (male / female %)	66.67 / 33.33%

Temporary employees only

Median / mean hourly pay gap	12.43 / 7.00%
Median / mean bonus pay gap	2.39 / 36.02%
% males / females receiving a bonus payment	48.29 / 49.31%
Upper quartile (male / female %)	52.84 / 47.16%
Upper middle quartile (male / female %)	52.13 / 47.87%
Lower middle quartile (male / female %)	46.10 / 53.90%
Lower quartile (male / female %)	42.55 / 57.45%

How we are building an inclusive business

We are committed to creating an inclusive and diverse business built on trust, and the following initiatives support our goals:

1. We are nurturing talent

SRG works with schools, colleges and universities to encourage people, both male and female to pursue careers in science, clinical and engineering. We give talks and attend careers events, we share our industrial and student placements with a university network, and we produce an annual survey to give people an insight into salaries, benefits and demand in the sector.

2. We support a Diversity and Inclusion Network

As part of the Impellam Group, we participate actively in the Diversity and Inclusion network which fosters an inclusive and diverse workforce by encouraging positive conversations that drive clear action.

3. We are building a culture of Virtuosity

We continue to invest in our Virtuoso programme which recognises that it is our managers who make the difference in building trust, relationships and better futures for our clients and our people. This focus on Virtuosity is central to our strategy and frees our managers from conventional thinking so they see new possibilities, enabling our people to realise their full potential and to thrive.

4. We address unconscious bias

All our people take and have access to training via our online learning system to help them understand, identify and address unconscious bias. We also offer this training to our customers as and when appropriate.

5. We facilitate conversations around flexible working

We are an inclusive business, and we encourage flexibility, including part-time work and home working. We hold conversations with managers through Open Blend, our coaching and development platform, which enables us to explore whether personal ambitions are being met, as well as business objectives. By addressing the whole person, we will create a more engaged, productive workforce that allows our people to be their authentic selves at work.
